

Quality Policy

The Independent Oilfield Inspection Company Ltd. was registered in July 1993 by the present owner and Director with the aim of offering a quality inspection service, specifically tailored to the particular requirements of its customers. This company would provide a full range of inspection techniques which are currently used and proven within the oilfield industry.

1. Non Destructive Testing
2. Rotary Tool and Tubular Goods Inspection.
3. Specialist Non Magnetic Material inspection

It is the intention of The Independent Oilfield Inspection Company Ltd to implement the principles of quality assurance to all company activities.

The implementation of the quality assurance policy shall be achieved by the dedicated application of the company's quality procedures.

The company recognises the importance of staff awareness and total commitment to quality, to this aim all existing and new members of staff will be trained in familiarity with the company's quality procedures. Staff will be encouraged to attend courses provided by industry lead bodies to further existing personal and company qualifications and accreditation, as detailed in the training programmes.

It is also the company's policy to abide by the code of practice laid down by lead industry bodies such as the American Petroleum Institute.

Our objectives include identifying processes needed for the quality management system and their application throughout our organization and determining the sequence and interaction of these processes. Determining criteria and methods needed to ensure that both the operation and control of these processes are effective. Ensuring the availability of resources and information necessary to support the operation and monitoring of these processes. Monitoring, measuring and analysing where applicable these processes and finally implementing actions necessary to achieve planned results and continual improvement.

To assist the company in achieving its quality objectives it is committed to operating in a manner that sustains registration to the International Standard for Quality Management ISO 9001:2000
